

Temperature sensor Basic NTC Temperature sensor for wall mounting

Technical specifications:

Ambient temperature: -20 - +80°C, non-condensing air
Accuracy temperature: 2%
Enclosure: IP20 - Wet rooms zone 3
Dimensions: 33x85x85cm
Sensor type: NTC 22K

Description:

Temperature sensor for wall mounting. Measures the temperature in a room.

To be used for equipment with NTC input.

Adjustment:

N/A

Mounting:

The temperature sensor should not be mounted in a location where it is exposed to direct sunlight, draft, other sources of heat (eg. tv) etc.
